Assessment of Program Outcomes/PSOs for Undergraduate Programs by Management **Staff**

Name:

Designation:

Mobile Number:

E-mail:

Dear participant,

Being a Management staff of the Institution, your valuable opinion & suggestions will assist us to improve our program educational objective & consequently, the quality to the best serve our stakeholders.

Please take few minutes to respond to the short questionnaire given below:

Instructions: Please give us your perception about the extent of acquiring following competencies while pursuing your undergraduate degree at the institution on a 4 point scale given below:

1= Acquired Very Well with proficiency

2= Acquired enough to do my work 3= Acquired Marginally (not adequate to do my work) 4 = Did not acquire at all

	Program Outcomes (POs)	1	2	3	4	Justification
						of your
						response
1.	Engineering knowledge: Apply the knowledge of mathematics,					
	science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.					
2.	Problem analysis: Identify, formulate, review research					
	literature, and analyze complex engineering problems reaching					
	substantiated conclusions using first principles of mathematics,					
	natural sciences, and engineering sciences.					
3.	Design/development of solutions : Design solutions for					
	complex engineering problems and design system components or					
	processes that meet the specified needs with appropriate					
	consideration for the public health and safety, and the cultural,					
	societal, and environmental considerations.					
4.	Conduct investigations of complex problems: Use research-					
	based knowledge and research methods including design of					
	experiments, analysis and interpretation of data, and synthesis of					
	the information to provide valid conclusions.					

Department of Electrical Engineering RCC INSTITUTE OF INFORMATION TECHNOLOGY CANAL SOUTH ROAD, BELIAGHATA, KOLKATA – 700015, WEST BENGAL

5.	Modern tool usage: Create, select, and apply appropriate			
	techniques, resources, and modern engineering and IT tools			
	including prediction and modeling to complex engineering			
	activities with an understanding of the limitations.			
6.	The engineer and society: Apply reasoning informed by the			
	contextual knowledge to assess societal, health, safety, legal and			
	cultural issues and the consequent responsibilities relevant to the			
	professional engineering practice.			
7.	Environment and sustainability : Understand the impact of the			
	professional engineering solutions in societal and environmental			
	contexts, and demonstrate the knowledge of, and need for			
	sustainable development.			
8.	Ethics: Apply ethical principles and commit to professional ethics			
	and responsibilities and norms of the engineering practice.			
9.	Individual and team work: Function effectively as an individual,			
	and as a member or leader in diverse teams, and in			
	multidisciplinary settings.			
10	. Communication : Communicate effectively on complex			
	engineering activities with the engineering community and with			
	society at large, such as, being able to comprehend and write			
	effective reports and design documentation, make effective			
	presentations, and give and receive clear instructions.			
11	. Project management and finance: Demonstrate knowledge and			
	understanding of the engineering and management principles			
	and apply these to one's own work, as a member and leader in a			
	team, to manage projects and in multidisciplinary environments.			
12	. Life-long learning: Recognize the need for, and have the			
	preparation and ability to engage in independent and life-long			
	learning in the broadest context of technological change.			
PR	OGRAM SPECIFIC OUTCOMES (PSOs)			
(Li	st of PSOs here)			
	Proficiency in use of software & hardware required to practice			
	ectrical engineering profession.			
	Proficiency in developing wind & solar hybrid power generating			
	stems			
	Development of wireless control & automation and real time			
sin	nulations for prototypes			
I		II	1	

Thank you
